About Me

4th year Computer Science student at the University "Dunărea de Jos" of Galați, passionate about software development, backend systems and modern applications. I have experience building desktop, web and mobile applications using C#, Java, Spring Boot, Android and MySQL. Currently looking for internship or junior developer opportunities.

Education

University "Dunărea de Jos" Galați — Computer Science (2022 – Present)

Technical Skills

Programming Languages	Java, C#, Python, C/C++, Kotlin, JavaScript, SQL
Frameworks & Technologies	Spring Boot, FastAPI, .NET Framework, Windows Forms, WPF, Firebase, REST APIs, Embedded Systems, Computer Vision
Databases & Storage	MySQL, SQLite, JSON, File Handling
Networking & Systems	TCP Sockets, Async Programming, HTTP Protocol, Client-Server Architecture, Multithreading
Mobile Development	Android Development, Intents & Fragments, Internationalization
Tools & Platforms	Git, GitHub, Postman, Selenium, Raspberry Pi, OpenCV
CS Concepts	OOP, Data Structures, Algorithms, Compiler Design, Parsing, Problem Solving
Soft Skills	Teamwork, Fast Learning, Communication, Adaptability, Working Under Pressure, Research & Experimentation

Projects

Spring Boot Web Application

Full-stack web application with authentication, MySQL integration and Selenium testing.

Java, Spring Boot, MySQL, Selenium

Android Daily Message App

Android application connected to a Firebase backend for dynamic daily messages.

Android, Firebase

GameVault — Android Game Catalog

Kotlin app for managing a personal game catalog with SQLite, RSS, JSON storage, multi-window navigation via Intents, reusable Fragments and internationalization in 4 languages.

Android, Kotlin, SQLite, JSON, RSS

Compiler & Syntax Tree Project

Custom interpreter and syntax tree system supporting loops, real types, comments and custom language parsing.

C/C++, Parsing, Interpreters

Connect 4 Game

Desktop game with arcade-style dark UI, GDI+ rendering and two-player gameplay logic.

C#, .NET Framework, Windows Forms, GDI+

HTTP GET Client via Raw Sockets

Networking application performing HTTP GET over raw synchronous sockets without high-level HTTP libraries. Dark terminal-style UI.

C#, .NET Framework, Sockets, HTTP

TCP Async Chat Application

Client-server chat with async TCP sockets and Windows Forms, extended with private messaging between connected users.

C#, .NET Framework, TCP, Async Sockets, Windows Forms

FastAPI Forum Backend

REST API with user authentication and forum endpoints, deployed and tested on a cloud VM.

Python, FastAPI, REST API, Postman

Battleship Multiplayer Game

Multiplayer TCP game with WPF GUI, interactive ship placement, real-time attack grid and in-game chat window.

C#, .NET, WPF, TCP Sockets, Multithreading

Hackathon Projects (2022-2024)

Indoor fire detection (2022), driver drowsiness detection (2023), face recognition system (2024) — all using Raspberry Pi and Pi Camera.

Python, OpenCV, Raspberry Pi

Bosch Future Mobility Challenge 2025

Contributed to autonomous driving functionality development and testing in a multidisciplinary team.

Embedded Systems, Computer Vision, Raspberry Pi, OpenCV

Areas of Interest

Backend Development • Software Architecture • Networking & Client-Server • Computer Vision • Mobile Development • Systems Programming
