ADELIN CHELARIU

JUNIOR SOFTWARE ENGINEER

Galati 800258, Romania | adelinchelariu@gmail.com | 0742410617 | LinkedIn

Personal Details:

Romanian | Cat. A, B | 27-11-2000 | Romania

SUMMARY

Computer Science graduate from "Dunărea de Jos" University of Galați with hands-on experience building C#/.NET applications, REST APIs, and database-driven systems through academic and personal projects. Alongside his studies, he has worked for 12 years in a family furniture business, developing discipline, responsibility, and a strong client focus. He is eager to start a career as a Junior Backend Developer, contributing clean, reliable code and growing within a collaborative team.

AREAS OF EXPERTISE

- Backend Development
- Computer Networking
- Object-Oriented Programming
- Relational Databases & SQL
- REST API Development

TECHNICAL PROFICIENCIES

Programming Languages:	C#, Java, Python, C++, JavaScript, Kotlin
Frameworks & Platforms:	Unity, .NET (WPF, Windows Forms), FastAPI, Node.js, Spring Boot, Firebase, Raspberry Pi
Databases:	PostgreSQL, MySQL, SQLite
Tools:	Git, GitLab, Postman
Other:	TCP/Socket Programming, Cloud (OpenNebula), Linux server deployment, Computer Vision-, Embedded Systems

ACCOMPLISHMENTS

- **Bachelor's thesis – Immune Defense:** designed and developed a 3D tower defense game in Unity (C#) with an original biopunk/immunology theme, including gameplay systems, enemy waves and tower mechanics.
- **PostgreSQL Monitoring App with AI Insights:** built a WPF desktop application (C#, MVVM) that tracks database performance metrics with live charts (LiveChartsCore) and generates insights using a locally hosted LLM (Ollama, Llama 3.2).
- **University Management REST API:** implemented the authentication module of a team-built FastAPI service, with Pydantic validation and automated pytest tests.
- **SOAP Web Service & Client:** developed a PHP SOAP service with a C# Windows Forms client and deployed it on a Linux university server, solving UTF-8 encoding and data disambiguation issues.
- **Networked Multiplayer Games:** built a multiplayer Battleship game with in-game chat (C#, WPF, TCP sockets) and an asynchronous TCP chat application with private messaging.

Security Testing: performed security and exploratory testing on OWASP Juice Shop, identifying SQL Injection, XSS and Broken Authentication vulnerabilities.

EDUCATION

Universitatea "Dunărea de Jos", Galați **Oct 2022 to Sept 2026**

Computer Science

Faculty of Automation, Computers, Electrical Engineering and Electronics. Field: Computers and Information Technology, Specialization: Computers.

- Bachelor's thesis: *Immune Defense*, a 3D tower defense game developed in Unity (C#).
- Relevant coursework: Object-Oriented Programming, Databases, Computer Networks, Web Technologies, Service-Oriented Systems, Software Reliability and Testing.

PROFESSIONAL EXPERIENCE

Furniture Maker, Family Furniture Business **Jun 2014**

Galați, Romania

Hands-on role in a family furniture business, supporting custom orders from client brief to installation.

- Delivered custom furniture projects end-to-end, from measuring and material preparation through assembly and installation.
- Calculated material requirements and project costs to reduce waste and keep orders within budget.
- Operated workshop machinery, including a circular saw, and edge banding machine, while maintaining strict safety and precision standards.
- Translated client requirements into completed orders and consistently delivered work by agreed deadlines.
- Built a strong track record of reliability, attention to detail and responsibility in a client-facing environment.
